To whom it may concern

We have been using two Waterpoint dispensers at our Bellshill depot for over a year and are delighted with them. Previously we used a bottle based supplier, which meant that we had numerous water containers in our office area, taking up valuable space, it is much more convenient to have a mains based system that never runs out.

Both machines are cleaned and checked on a regular basis, meaning that our staff have no involvement with this equipment apart from actually using it ! All our staff are happy with the quality and temperature of the dispensed water, to summarise, changing to Waterpoint has been "one of our better decisions"

Regards
